

Detailed Claim Listing

The listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Previously Presented) A system for collecting information relating to equipment located at a site, the system comprising:
 - a first database including legacy data relating to at least a portion of the equipment;
 - a server including software for importing the legacy data into a specified data structure and for exporting the specified data structure and a survey process; and
 - a mobile survey device for receiving the specified data structure and the survey process and the legacy data prior to performing a survey and for guiding a user in collecting the information;

wherein the specified data structure includes a set of equipment categories and a set of attributes relating to each category.

Claims 2-6 (Canceled).

6. (Previously Presented) The system of claim 1 wherein the survey device is further configured to communicate the information collected to the server.
